

Valentin Fontanger

International ML engineer with a strong ability to communicate complex results clearly to non-technical teams.
I align AI research + engineering with real-world impact and invest heavily in cross-functional collaboration.
Open to relocation. Currently working in South Korea (E71 visa)

EDUCATION

UNIVERSITY OF TOKYO

EXCHANGE, RESEARCH INTERN
Sep 2022 - Mar 2023 | Tokyo

SORBONNE UNIVERSITÉ

MSC : ARTIFICIAL INTELLIGENCE
Sep 2021 - Sep 2023 | Paris
• Distinction : honors

BASC : APPLIED MATHEMATICS

Sep 2018 - May 2021 | Paris
• Distinction : honors

SKILLS

PROGRAMMING

- Python
- Javascript
- C++ (beginner)

AI / ML

- Computer Vision
- NLP
- Transformers
- Deep Learning
- Machine Learning
- Statistics
- edge-device inference
- quantization, pruning
- Model evaluation
- Generative AI
- LLM & VLM

FRAMEWORKS

- React
- FastAPI
- Django

LANGUAGES

- French (native)
- English (fluent)
- German (Basics)

CONTACT

- Local : +82 10 9721 2404
- WhatsApp : +33 6 63 73 43 42

WORK EXPERIENCE

SPACE-VISION.AI | MACHINE LEARNING ENGINEER

Feb 2025 - Present | Seoul

- Applied advanced **computer vision models** including **object detection, tracking, action recognition**, improving automated video analytics accuracy and robustness for **in-store customer behavior analysis**.
- Built a **multi-camera ReID model** for **customer tracking**, boosting Rank-1 from 60% to 80%+ and mAP by 30%, enabling **real-time analytics on edge devices**.
- **Cut labeling costs by 74% and annotation time by 90%**, deploying large multi-modal Transformers. Worked with **GPU optimization, cloud-based inference, and Docker** to integrate into a **CUDA-enabled CVAT fork, growing high-quality data by 200%**.
- Generated **massive synthetic datasets using Nvidia Omniverse**. Trained semantic segmentation, object detection and action recognition models, with strong generalization.
- Deployed **on-site real-time camera systems** across Chicago, Las Vegas, Tokyo, Germany, and South Korea, **collaborating with cross-functional teams. Secured key deals with LG, Roche and SoluM**.

Tech Stack: PyTorch, NumPy, OpenCV, Docker, Cloud (GCP, AWS), FastAPI, Redis, Linux, CUDA, ONNX, Cython, Python

MEMENT.AI | QUANT RESEARCHER

Aug 2024 - Jan 2025 | Seoul

- Research on **Transformer models for Time Series modeling**.
- Integrated Machine Learning strategies to support algorithmic trading decisions.

CYPHERMOTION | FOUNDER

March 2024 - Oct 2024 | Paris

- **Founded a Computer Vision startup** delivering motion feedback for tennis players using cell-phone video analytics. **Led a 4-member international team** across France, Germany, the US, and Japan.
- **Developed and deployed deep learning models** and temporal tracking; implemented a **multi-head Transformer architecture** for motion embedding, classification, and pose estimation.

E.ON | QUANT ML ENGINEER

Dec 2023 - Mar 2024 | Prague

- Implemented advanced **forecasting models** for oil and gas demand and price using **traditional statistical methods** and **Transformers / RNNs**. Trained and deployed these models on a weekly basis.

INTERDIGITAL | RESEARCH INTERN

Apr 2023 - Sep 2023 | Los Altos California

- **Deep Learning based neural video compression research** in the heart of the Silicon Valley.
