

# Valentin Fontanger

International ML engineer with a strong ability to communicate complex results clearly to non-technical teams.

I align AI research + engineering with real-world impact and invest heavily in cross-functional collaboration.

Open to relocation. Currently working in South Korea (E71 visa)

## EDUCATION

### UNIVERSITY OF TOKYO

EXCHANGE, RESEARCH INTERN

Sep 2022 - Mar 2023 | Tokyo

### SORBONNE UNIVERSITÉ

MSC : ARTIFICIAL INTELLIGENCE

Sep 2021 - Sep 2023 | Paris

BASc : APPLIED MATHEMATICS

Sep 2018 - May 2021 | Paris

## SKILLS

### PROGRAMMING

- Python
- Javascript

### AI / ML

- Computer Vision
- NLP
- Transformers
- Deep Learning
- Machine Learning
- Statistics
- Pandas, Numpy
- Pytorch
- Docker
- ONNX
- Scikit-learn
- Model evaluation
- Generative AI
- LLM & VLM

### FRAMEWORKS

- React
- FastAPI
- Django

### LANGUAGES

- French (native)
- English (fluent)
- German (Basics)

### CONTACT

- Local : +82 10 9721 2404
- WhatsApp : +33 6 63 73 43 42

## WORK EXPERIENCE

### SPACE-VISION.AI | MACHINE LEARNING ENGINEER

Feb 2025 - Present | Seoul

- Applied advanced **computer vision models** including **object detection, tracking, action recognition**, improving automated video analytics accuracy and robustness for **in-store customer behavior analysis**.
- **Cut labeling costs by 74% and annotation time by 90%**, deploying large multi-modal Transformers. Worked with **GPU optimization, cloud-based inference, and Docker** to integrate into a **CUDA-enabled CVAT fork**, growing high-quality data for demographics by 200%.
- Deployed **on-site real-time customer attention tracking systems** across US, Europe and Asia, **collaborating with cross-functional teams**, **Securing key partnerships** with LG, Roche and SoluM.

### MEMENT.AI | QUANT RESEARCHER

Aug 2024 - Jan 2025 | Seoul

- **Transformer for Time Series modeling**, with a focus on feature and temporal attention mechanism for medium frequency trading.

### CYPHERMOTION | FOUNDER

April 2024 - Oct 2024 | Paris

- **Founded a Computer Vision startup** delivering motion feedback for tennis players using cell-phone video analytics. **Led a 4-member international team** across France, Germany, the US, and Japan.
- Implemented a **multi-head Transformer architecture** for motion embedding, classification, and pose estimation reducing computational redundancies.
- Analyzed 3D pose trajectories using **statistical and time-series** methods such as dynamic time warping for spotting key **biomechanical inflection points in tennis players' motions**.

### E.ON | QUANT ML ENGINEER

Dec 2023 - April 2024 | Prague

- Built and productionized **time-series forecasting models** for oil and gas demand and price, using traditional Machine Learning techniques. Performed weekly **training, validation, and deployment** cycles.
- Developed a news-analytics pipeline using Azure OpenAI, including a **RAG system for fast retrieval of macroeconomic news and research reports** used by the macro analysts team.

### INTERDIGITAL | RESEARCH INTERN

Apr 2023 - Sep 2023 | Los Altos, California

- Deep Learning based neural video compression research in the heart of the Silicon Valley.

### RAKUTEN - UTOKYO | ACADEMIC PARTNERSHIP

Oct 2022 - Feb 2023 | Tokyo

- Analyzed cashless payment adoption and consumer behavior across Japanese regions, examining modality usage patterns and item-level purchasing trends.
